SUMMARY

Data Science fresher with a 6-month Data Science Consultant internship at Rubixe, delivering 4+ client proof-of-concept projects in predictive modeling, EDA, and feature engineering on datasets of 200,000+ records. Hands-on with Python, SQL, and Scikit-learn; built a Random Forest regression model with 90% accuracy and deployed it as a live Streamlit app. Certified Data Scientist (DataMites; NASSCOM FutureSkills Prime, Gold).

SKILLS

Programming: Python, SQL

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Machine Learning: Supervised Learning (Regression, Classification), Linear Regression, Logistic Regression, Decision Tree, Random Forest, KNN, XGBoost

Statistics: Descriptive Statistics (Mean, Median, Mode, Variance), Correlation

Data Work: EDA, Data Cleaning, Feature Engineering (One-Hot Encoding), Model Evaluation (R^2, RMSE, Accuracy, Precision/Recall, Cross-Validation)

Databases: MySQL, PostgreSQL, MongoDB

Tools: Jupyter Notebook, Git/GitHub, VS Code, Streamlit, Power BI, Excel

Cloud: AWS (basic), Microsoft Azure (basic)

PROJECTS

Insurance Cost Prediction | Python, Pandas, Scikit-learn, Matplotlib, Seaborn, Streamlit — Live App | GitHub

- Developed a regression pipeline to predict medical insurance charges from age, BMI, smoking status, and region using a 1,338-record dataset.
- Applied feature engineering and one-hot encoding to categorical variables, then trained and compared 3 models: Linear Regression, Decision Tree, and Random Forest.
- Achieved 90% accuracy with Random Forest, the best of the 3 models; identified smoking status as the strongest predictor of insurance charges and visualized results with Matplotlib and Seaborn.
- Deployed the trained model as a live, publicly accessible Streamlit web app.

Customer Shopping Behavior Analysis | Python, SQL, PostgreSQL, Power BI — GitHub

- Analyzed 3,900 customer purchase records in PostgreSQL to identify revenue drivers, shopping patterns, and customer behavior.
- Found that 73% of customers were non-subscribers while loyal/subscribed customers drove disproportionately more revenue than one-time buyers, revealing a major subscription-conversion opportunity.
- Visualized findings in Power BI and presented a retention-focused recommendation to stakeholders.

EXPERIENCE

Data Science Consultant Intern | Rubixe, Pune, Maharashtra, India — **Dec 2025 – Jun 2026**

- Delivered 4+ proof-of-concept data science projects for clients over 6 months, working with a mentor to scope problems, build solutions, and present findings on schedule.
- Cleaned and explored datasets of 200,000+ records using Python and Pandas (EDA), cutting manual data-prep time and speeding up client deliverables.
- Built and evaluated predictive regression models in Scikit-learn, benchmarking Random Forest (90% accuracy) against Linear Regression and Decision Tree baselines.
- Wrote SQL queries for data extraction, filtering, and aggregation, and developed Power BI dashboards that gave stakeholders self-serve KPI visibility and reduced ad-hoc reporting requests.

EDUCATION

Bachelor of Computer Applications (BCA) | KCE M.J. College, Jalgaon, Maharashtra — **Apr 2025**

CGPA: 8.7 / 10

CERTIFICATIONS

- **NASSCOM FutureSkills Prime** – Certified Data Scientist, Gold Category (Sep 2026)
- **DataMites** – Certified Data Scientist Training Program (Sep 2025 – May 2026)
