VIVEK BHOSALE

Data Analyst | SQL · Python · Power BI · Excel

Pune, Maharashtra, India | +91 9370962795 | vivekbhosale061@gmail.com | linkedin.com/in/vivek-bhosale | github.com/Vivek061

PROFESSIONAL SUMMARY

Data Analyst fresher skilled in SQL, Python (Pandas), Excel and Power BI. Completed a 6-month Data Science Consultant internship at Rubixe, cleaning and analyzing 200,000+ records and building KPI dashboards and reports for client stakeholders. Turns raw business data into clear, actionable insights. Certified Data Scientist (DataMites; NASSCOM FutureSkills Prime, Gold).

SKILLS

Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, KPI Tracking & Reporting, Trend Analysis

SQL: Joins, Subqueries, CTEs, Window Functions, Aggregations (GROUP BY / HAVING)

Visualization & BI: Power BI (Dashboards, Data Modeling, DAX Basics, Power Query), Excel (Pivot Tables, VLOOKUP, INDEX-MATCH, COUNTIF/SUMIF), Matplotlib, Seaborn

Programming: Python (Pandas, NumPy), SQL

Databases: MySQL, PostgreSQL, MongoDB

Statistics: Descriptive Statistics, Correlation

Tools & Cloud: Jupyter Notebook, Git/GitHub, VS Code; AWS (Basic), Microsoft Azure (Basic)

Soft Skills: Reporting, Stakeholder Communication, Problem Solving

PROJECTS

Customer Shopping Behavior Analysis | Python, PostgreSQL, Power BI GitHub

- **Problem:** Analyzed 3,900 customer purchase records in PostgreSQL using SQL to identify revenue drivers, shopping patterns and customer drop-off points.
- **Insight:** Found that 73% of customers were non-subscribers, while loyal/subscribed customers contributed disproportionately more revenue than one-time buyers, revealing a clear subscription-conversion opportunity.
- **Impact:** Built Power BI dashboards to visualize the findings and presented a retention-focused recommendation to stakeholders.

Insurance Cost Prediction | Python, Pandas, Scikit-learn, Streamlit Live App | GitHub

- **Problem:** Analyzed a 1,338-record insurance dataset to understand which factors (age, BMI, smoking status, region) drive medical insurance charges.
- **Analysis:** Applied feature engineering and one-hot encoding with Pandas and visualized cost patterns in Matplotlib and Seaborn.
- **Insight:** Identified smoking status as the strongest cost driver, with age and BMI also influential; Random Forest delivered the best accuracy (90%) against Linear Regression and Decision Tree baselines.
- **Deployment:** Published the project as a live Streamlit web app: insurance-cost-prediction-public.streamlit.app

EXPERIENCE

Rubixe – Data Science Consultant Intern Dec 2025 – Jun 2026

Pune, Maharashtra, India (6-month internship)

- Delivered 4+ proof-of-concept analytics projects for clients, working with a mentor to scope problems, analyze data and present findings within project timelines.
- Cleaned and analyzed datasets of 200,000+ records using Python and Pandas, cutting manual data-prep time and speeding up turnaround on client deliverables.
- Developed Power BI dashboards and Excel reports that gave stakeholders self-serve visibility into KPIs and trends, reducing ad-hoc reporting requests.
- Wrote SQL queries for data extraction, filtering and aggregation to support recurring client reporting needs.

EDUCATION

Bachelor of Computer Applications (BCA) – CGPA: 8.7 / 10 Apr 2025

KCE M.J. College, Jalgaon, Maharashtra

CERTIFICATIONS

- **NASSCOM FutureSkills Prime** – Certified Data Scientist, Gold Category (Sep 2026)
- **DataMites** – Certified Data Scientist Training Program (Sep 2025 – May 2026)
